Art Unit: 1742

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 9, 10, 13, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Saito et al.

Saito et al. disclose at col. 21, lines 11-23, a composition comprising:

a mixture of a first phase of titanium; and

a second phase of NaCl inclusions.

Saito et al. further disclose wherein the titanium phase is an alloy phase and/or a hydride phase (col. 11, lines 1-28).

Saito et al. further disclose wherein the mixture is die pressed and sintered (col. 14, lines 4-17).

The Examiner notes that the NaCl is used to treat the titanium powder, and is not used in the compaction/sintering process, however, claim 1 does not require a sintering step, but states this as a possible use.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1742

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 11 refers to "sintering" with an antecedent basis to claim 1, but claim 1 contains no positive limitation.

5. Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The overall limitation of claim 14 is not clear, the term "capable of" not providing a clear limitation to the claim. Is Applicant intending a method claim producing the sintered compact of claim 14?

6. Claims 21-23 provides for the use of the sintered product, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 21-23 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under

35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

7. Claims 6-8 and 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The Examiner finding that the prior art does not teach or suggest the binder inclusion in the phase mixture, an oxide or nitride of the titanium, and the inclusion of an organic binder.
